Technical Specifications of Wire Embedded Silicone Rubber Gasket

The **conductive Wire Embedded silicone elastomer Gaskets** are made by metal mesh, metal powder powder and silicon. They have excellent EMI shielding effectiveness and environment sealing and long life time. The conductive fillers are **nickel graphite, silver glass, silver aluminum, silver copper.**

These Wire embedded Gaskets are an extension of regular EMI shielding materials of silicone rubber. They are similar to Conductive Silicone Gaskets but often used in applications where close contact with the surface is vital.
